

AUTO TEST® WORKSHOP PRO 10

10" PREMIUM TABLET WITH DECELEROMETER

IMPORTANT THINGS TO KNOW

- **READ YOUR MANUAL INC. ACTIVATION STEPS** - This can be found in the USB stick provided in the box, or on our website.
- You need to be connected to Wi-Fi to activate your license
- New users must activate their license through the **Workshop Manager App**
- You can renew your license 30 days prior to your expiry date

WORKSHOP MANAGER APP:

- Application for managing and purchasing apps and licenses.
- Open this app first to start your 12-month license.
- Follow prompts to activate and enter warranty information.

THIS IS
WHAT THE
**WORKSHOP
MANAGER
APP** LOOKS
LIKE

BRAKEPRO APP:

- Application for brake testing.
- Open this application after activating Workshop Manager app.
- Follow prompts to use BrakePro app.

THIS IS
WHAT THE
**BRAKEPRO
APP** LOOKS
LIKE

BLUETOOTH PRINTER:

- To turn on, hold ON button for a few seconds.
- Follow prompts in BrakePro app to connect and print.

HOW TO TAKE A SCREEN SHOT OF YOUR RESULTS:

- Hold Power button and Volume Down button at the same time for a couple of seconds.
- This screen shot will be saved on the tablet. Go to FILES app and click on IMAGES tab. Then click on the SCREEN SHOT folder at the top to find your image.
- You can email this image if you set up your emails on this tablet.

When the BrakePro app starts, it shows “Looking for GPS Signal” for a long time and I can’t use the unit.

Your unit is having trouble acquiring a signal, take the unit outside. Alternatively connect your unit to a Wi-Fi network to assist in establishing a connection, this can reduce start up time considerably.

My brake software is expired. How do I reactivate it?

Through the Workshop Manager app. You need to make sure that you have the latest version of the Workshop Manager app to reactivate your license. If the Workshop Manager app prompts you to download an update, press on DOWNLOAD and wait for the update file to be downloaded into your Workshop Pro 10 Tablet. Once it is done, a prompt saying DO YOU WANT TO INSTALL AN UPDATE TO THIS APPLICATION will be displayed. Press INSTALL and wait for the installation to finish. Once done, press OPEN to open the newly updated Workshop Manager app. You can then proceed to reactivate your license by pressing PURCHASE LICENSE and follow the on-screen instructions to proceed. If the BrakePro app still do not recognise the new license, restart the BrakePro app.

How do I know what version of software I have?

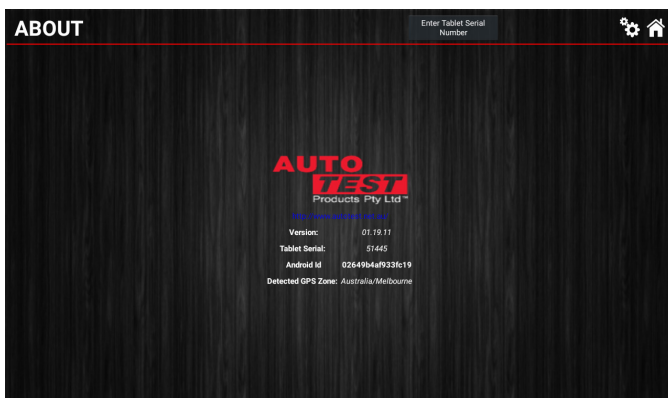

Figure 1: The About screen shows your software version number, tablet serial number, android ID, and your GPS location zone.

Go to: SETTINGS > ABOUT > VERSION
(See Fig 1 below)

Where can I find my Serial Number?

Go to: SETTINGS > ABOUT > TABLET SERIAL
(See Fig 1 below)

When should I calibrate my Workshop Pro?

Calibration is required yearly. This can be done yourself through BrakePro app by going to SETTINGS > CALIBRATION. If there is a prompt saying VALID CALIBRATION DATA FOUND, press NEW to proceed to the calibration procedure.”

***IN NSW YOU MUST SEND YOUR WORKSHOP PRO AND PEDAL EFFORT SENSOR TO US FOR YEARLY CALIBRATION.**

When do I need to send in my Workshop Pro?

You do not need to*. If you are having issues with the Workshop Pro (i.e. Won't charge or won't turn on), you can take the device to your nearest Distributor. Alternatively, call our service line (3 8840 3016) for advice before sending your unit back.

My unit prompts me to update the BrakePro app but shows an error when it tries to install.

Contact Service Team and they'll walk you through this issue.

Figure 2: Workshop Pro in position ready for testing. If the unit is moving in the seat, place on the floor of the passenger seat. Supplied velcro will secure in place.

When activating my unit, I get an error such as 'Address field too long' or similar.

Please check your address. If the address is very long you may need to abbreviate it. Do not use special characters such as commas or slashes, as these will trigger errors. Just leave a space in their place when possible.

The app is running slowly when sorting out stored tests.

Please clean up tests regularly by transferring them to the computer using the USB cable.

The time on my unit is wrong, how do I fix this?

Change the time to AUTOMATIC if you had changed it manually. If it's on network time but still incorrect, connect to a network to get the updated time.

The time zone may be wrong, so swipe up on the bottom of the screen and press the circle button. Once you're on the home screen swipe on the middle of the screen to open up the list of apps. Open 'Settings' and scroll down to select System Settings. Then select Date & Time. Switch off Automatic Time Zone if it's on and then set correct Time Zone manually if that is wrong.

My results are in the wrong units, how do I change them?

Open Settings from the Brake Pro app's main menu and then select Test Results Settings. Choose your desired Units and then press either the house or gears icons to save your choice. You can also change the units for deceleration on the test results screen by pressing on the deceleration readings and choosing from the menu that pops up.

Why am I getting a speed error?

The Workshop Pro is moving relative to the vehicle. This is a common error when the unit is not secured properly to the vehicle. See *Figure 2 on previous page*. The supplied Velcro will stop your Workshop Pro from moving, when attached to the carpet floor on the passenger side of the vehicle.

Never hold in your hand for the test, or between your legs, or on the floor of the driver's side.

How do I delete a saved result?

To delete individual saved test results, open Database on the main App menu. Hold your finger down on the test you want deleted and it will be highlighted in red. You can then select multiple tests to be deleted. Click the trash can in top right corner to delete the selected tests.
